**FCC ID: 2ABQR-M100**

Thank you for choosing M100 intelligent  
tablet computer thin.

M100 is based on a fashion intelligent tablet  
computer Android™ operating system, equipped with 7  
inch high-definition screen, screen HD, 10mm extreme  
ultra-thin fuselage, dreamlike appearance, streamline  
shape, taste different.

The M100 is designed for WCDMA/GSM  
network dual-network dual standby intelligent  
tablet computer, using the latest Android™  
4.2.2 system, with strong dual-core processor, the  
industry high-end

performance guarantee perfect experience.7 inch

screen, reducing the nature pure bright colors;

M100 new design more concise interface, desktop exquisite

small parts, perfect to decorate your personalized desktop;

M100 exclusive special software, call

management, books will be an easy job

to. Shine M100, worth you savor!

Do not use any root tool of

the tablet computer, otherwise there may be failure can not

be restored, the root tablet computer did not enjoy

the warranty!

Please read the manual carefully before use.

The effect is very beautiful; Video: through similar 3D frame display memory of video, direct solution of video frame to play the video.

### **Navigation:**

Google Maps Navigation Application

### **Gmail:**

by creating a Google email account, use flat computer to send or receive e-mail.

### **Warning Statement**

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the

equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

- - Consult the dealer or an experienced radio/TV technician for help.

### 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference,
- (2) this device must accept any interference received, including interference that may cause undesired operation.

SAR tests are conducted using standard operating positions accepted by the FCC/IC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

The SAR limit of (FCC/IC) is 1.6 W/kg averaged over one gram of tissue. Device types: M100 has also been tested against this

SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.702W/kg and when properly worn on the body is 0.912W/kg. This device was tested for typical body-worn operations with the back of the handset kept 0.0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0.0m separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.

### Use Conditions:

This device complies with Industry Canada licence-exempt RSS standard(s): Operation is subject to the following Two conditions:(1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. CAN ICES-3 (B)/NMB-3(B)

Le présent appareil est conforme aux CNR d' Industrie Canada applicables aux appareils radio exempts de licence.

L' exploitation est autorisée aux deux conditions suivantes :

- (1) l' appareil ne doit pas produire de brouillage, et
- (2) l' utilisateur de l' appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d' en compromettre le fonctionnement.

**Note:** The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user' s authority to operate the equipment.
